

Charleston In 2003!

Digital Projection Theater Proposal Form
National Stereoscopic Association Convention
Charleston in 2003
July 23-28, 2003

All digital files must be received by email or CD by June 1 for consideration

Thursday evening, July 24, will be exclusively digital. Programs may also be shown at other times during the convention.

STILL IMAGES are to be 2XGA resolution (double 1024x768= 2048x768). Preferably, the double image will be set up in a cross-view fashion, but parallel view will be accepted. The order of the images will be alphabetical, so arrange the image titles accordingly. Currently there is no provision for sound synchronization- images will need to be advanced manually. For instructions on setting up 2XGA digital images, please access the website page at <http://studio3d.com/pages/stereoproj.html> .

STEREO VIDEOS will be accepted in interlaced format. Mini-dv or dvd preferred.

We will have the INFOCUS LP-530 video projectors (2000 lumen, xga) for presentation. Direct questions to Ron Labbe via email ron@studio3d.com

We are looking for shows which are short and sweet!

Description of show: _____

Equipment required in addition to that listed above (Do you plan to provide it?)

Name: _____
Address: _____
City: _____ State/Province: _____
Country: _____ ZIP/Postal Code: _____
